## PermiTrack<sup>ESC</sup>

The web-based home for your NPDES stormwater permit.

[www.mynpdespermit.com](http://www.mynpdespermit.com)

**PermiTrack<sup>ESC</sup>** is a web tool that allows you or any number of staff in any location to load and view erosion/sediment control permit information.

- Project-specific inspections
- Administer contractor self-inspections
- View project information and inspection history
- Create live inspection reports
- Issues overdue inspection alerts
- Public access/feedback opportunity

Using a hand-held tablet, smart phone or laptop computer, field personnel can visit a site, create an inspection report, take and save photos, view the site's erosion control inspection history, and record observations that are automatically entered into the database. No paper to keep track of or file. No re-entering information, and the information is immediately available to any authorized user with Internet access.

**PermiTrack<sup>ESC</sup>** also provides easy access to the information using an accessible public map interface. Users view all active construction projects' key information and saved inspection records. If a problem is reported, **PermiTrack<sup>ESC</sup>** immediately alerts the responsible person to conduct a site visit to or complete other actions to maintain permit compliance. Save time and money, and improve your erosion control program.

No paper. No filing. No fooling.
